

Weather

1. Memorize Job 37:5-6
2. Learn about and be able to explain a Thermometer and Anemometer.
3. Find pictures of people dressed in different types of clothes and discuss what type of weather they might be dressed for. Make a poster or collage.
4. For two weeks keep a weather chart of the weather in your area.
5. Do two crafts related to weather.
6. Watch a video or read a book about weather.
7. Define: snow, hail, rain, tornado, hurricane, flash flood, thunderstorm

Helps:

2. Thermometer: measures temperature, Anemometer: measures wind speed.
3. Clothing catalogs are a good source for pictures.
4. The chart could include information such as daily temperature (high and low), weather of the day (sunny, rainy, overcast, etc.).
5. You can find lots of options online.
6. *Oh, Say Can You Say What's the Weather Today* by Tish Rabe is an excellent option for a book. Video's you can find online.
7. Snow: frozen precipitation consisting of hexagonally symmetrical ice crystals that form soft, white flakes
Hail: precipitation in the form of spherical or irregular pellets of ice
Rain: liquid precipitation, water falling from the sky
Tornado: a violently rotating column of air extending from a cloud to the ground
Hurricane: a severe tropical cyclone
Flash Flood: a sudden flood of great volume
Thunderstorm: a transient, sometimes violent storm, often accompanied by rain and sometimes hail
